

FENTON DEFIBRILLATOR

An emergency defibrillator has been installed at:

Oak View, Main Street, Fenton

If you should ever need the use of this, please use the Lock Code that has been issued to each household. If you need sight of this code again please go to the Contacts page and submit your request.

Please keep the code safe and secure.

The Defib has been registered with the Ambulance Service through The Circuit (British Heart Foundation) so you can also call 999 in an emergency and they will be able to give you the code.

The device is incredibly easy to use, comes with instructions and can be used without any training at all. However, click on the link below to view a training video provided by London Ambulance Service
